

Surry County Public Schools

Why we need your support

***Would you like to contribute to the
Local School Wellness Policy for Surry County Public Schools?***

A successful wellness committee must have members with a passion for children's nutritional health and fitness. Teachers, school staff, parents and community members who understand the value of addressing children's health as part of the effort to improve academic performance are key supporters. Including other key stakeholders, including food service staff, PTO/PTA leaders, teachers, health professionals, and students, is necessary for the successful implementation of policies.

If you are a parent, community member, teacher, staff member or student interested in becoming a member of the School Health Advisory Board, please contact:

**Renita Bailey, Human Resources / Food Service Supervisor
PO Box 317/45 School Street
